
Goal

To update the layout and visual design of equipper.com in order to integrate the shop with the existing laketahoecf.com website, and to add a digital download feature and dynamic navigation to equipper.com.

Process

Wire frames will be submitted that map the overall site layout and architecture. After wire frame approval, fully designed mock ups of key pages within the site will be submitted for approval/revision, with a maximum of two revisions (if necessary). Web development will commence upon approval of the overall site design and continue until completion of project.

Global Components (custom)

- Dynamic navigation bar.
- A global flash header.

Home

- Static misiion statement

Contact

- Static contact info.

Evangelism Seminars

- Dynamic seminar information.

Upcoming Events

- Dynamic list of events.

Shop

- Existing features.
- Mp3 downloads.
- More room for product content.

Cost

The cost to design and program the website including the pages above will be \$2000.

The development of this site would take a minimum of 1 month with a maximum of 2 months. Kick off dates and launch dates would be discussed upon receiving 50% of the cost up front.
